

Lab Title

Purpose: Restate the purpose of the lab from the lab handout
This should be word for word.

Definitions: (if necessary) If the lab contains any definitions copy them here. Skip lines between definitions if there is more than 1.

Predictions: 1.) Answer each of the prediction questions after reading through the entire lab.

2.) Answers should be in complete sentences.

3.) Answers should explain why you made the prediction you made

Data/Observations: Include data from your lab in a neat organized fashion. You should probably do your initial data collection on a separate piece of paper then copy it neatly in this section. If you have any graphs or tables they should be included here.

conclusions: 1.) Answer each of the conclusion questions here.

2.) Answers should be in complete sentences

3.) Answers should explain why things occurred as they did.

4.) If your predictions were incorrect, answers should say why they were incorrect.
